Chanyoung Lee, South Korea

It was very impressive that all lecturers were so helpful and friendly, and the lectures were very interesting and interactive. The mentors are very caring, always smiling, doing everything to make our time in Lithuania and Šiauliai great and memorable. The dormitory is a really good place to experience different cultures and living styles. It is really safe and clean.

Sahil Saini, India

Šiauliai University is the right place to study. The staff and students are always supportive and very friendly. Šiauliai city is also a beautiful city with nice and calm people. Most important is the unforgettable dorm life and Erasmus students that would be hard to find in another place. Šiauliai is a nice city, people here are kind and calm.

Taissiya Glukhova, Kazakhstan

I was very surprised that here in Lithuania you can choose the field of final theses. It is good that students can be free to choose their topic of interest. Šiauliai University has a mentors' program (ESN). It is a very good program, because every international student has his/her own mentor – a student from Šiauliai University. Mentors meet students in the station, help them with integration into the University's community, and also become friends. My mentor is my best friend in Lithuania.
